

BLM ENGINE DRIVER REFRESHER TRAINING

Objectives and Documentation

- ☐ Demonstrate knowledge of BLM driving policy stated in the *Interagency Standards for Fire and Fire Aviation Operations*.
- ☐ Demonstrate and document a correct pre-trip inspection on the fire engine in the *Fire Engine Maintenance Procedure and Record (FEMPR)*. This includes demonstrating how to either personally correct or arrange for the correction of identified deficiencies.
- ☐ Demonstrate how to properly start up and shut down the fire engine.
- ☐ Demonstrate the following correct driving procedures and skills:
 - Stop and begin moving an engine on a flat surface
 - Stop and begin moving an engine on an incline
 - Stop and begin moving an engine on a decline
 - Merging with traffic on roads
 - Controlling engine speeds for various road and traffic conditions
 - Maneuvering engine in city traffic
- ☐ Demonstrate properly parking and securing of the engine at various locations; e.g., fireline, city/town, work yard, road shoulder.
- ☐ Demonstrate the following off-highway driving skills:
 - Maneuvering along a two-track road
 - Maneuvering through washouts and draws
 - Maneuvering through rocky terrain with use of spotter
 - Maneuvering through heavy brush
 - Maneuvering on rough, steep slopes and side hills
- ☐ Perform a mock mobile attack operation with two crew members.
- ☐ Discuss and demonstrate use of the S.T.O.P. procedure.
